

Ayushmaan Jha

Software Engineer | Python | AI Automation

+91-7658025756 | ayushmaanjha08@gmail.com | [LinkedIn](#) | [Github](#)

TECHNICAL SKILLS

Programming Languages: Python, SQL

Backend: FastAPI, REST APIs, PostgreSQL, SQLAlchemy, Webhooks, Authentication Systems

GenAI & Automation: LLM APIs, RAG, Prompt Engineering, Workflow Automation, Vector Search

Tools: Git, GitHub, Docker, Linux, LangChain, Whisper, ChromaDB/FAISS

PROJECTS

[Operon – AI Workflow Automation Platform](#) | Python, FastAPI, Groq (LLM APIs), REST APIs, SQLAlchemy, Next.js

- Built an AI-powered workflow platform for **lead ingestion, LLM analysis, scoring, and automated execution**.
- Developed FastAPI/REST endpoints with PostgreSQL and SQLAlchemy for **lead processing and workflow management**.
- Integrated LLM-based lead classification and scoring with **webhook-driven automation** for real-time processing.

[INDICSWITCH](#) | Voice-Enabled RAG System | Python | FastAPI | Whisper | LangChain | ChromaDB/FAISS (Ongoing)

- **Developing a voice-enabled RAG pipeline** combining Whisper-based speech recognition, document processing, retrieval, and LLM-generated responses.
- **Implementing core RAG components** including document **ingestion, text chunking, embeddings, vector indexing, and top-K retrieval** while evaluating how retrieval context affects response quality.
- **Experimenting with retrieval strategies, context construction, and response validation**, with retrieval quality, latency, and grounding evaluation currently in progress..

WORK EXPERIENCE

[Modo AI](#) — Prompt Engineer & AI Image Production Specialist (Contract)

May 2026 – Present

- Built an AI image-production workflow from **raw DNG garment photography, covering prompt engineering, Gemini generation, refinement, branding, and final asset preparation** while preserving garment details and identity. .
- Produced professional product imagery for local apparel manufacturers and wholesalers, typically processing **6–10 raw garment references** per assignment and iterating on pose, composition, lighting, environment, and garment fidelity
- Prepared separate **WhatsApp-ready and print-ready assets**, upscaling selected outputs from ~8–16 MB to **50–100 MB** while maintaining visual quality.

[IBM](#) (Summer Inter 2025–XR Simulation Project)

- Optimized **3D assets and Unity workflows** for an AI-enabled emergency evacuation simulation, improving real-time rendering performance.
- Reduced rendering overhead by **~30–40%** while maintaining visual quality; supported navigation, testing, and interactive simulation workflows.

[Stealth AI Startup](#) — Junior AI Backend Developer

June - July (2026)

- Developed Python/FastAPI backend components for **LLM-powered multi-agent orchestration**, integrating model APIs with **tool-calling capabilities** and custom execution logic.
- Implemented **agent lifecycle state management, routing, structured outputs, and error recovery** for multi-agent workflows.
- Diagnosed **state synchronization and persistence issues** across concurrent agent processes and tool executions.

EDUCATION

B.Tech., Computer Science & Engineering (Graphics & Gaming) — UPES, Dehradun

2026
